

Now you can experience the beauty of wood...

SurfaceWorks® **ECO**WOOD™

RITZ CORDOVAN

SIERRA

KONA

Three different finishes, many different shapes, one tough top.

ECOWood™ is a highly durable urethane specially treated to mimic the grain, color, and beauty of real wood.

Unlike real wood edges, every table edged in ECOWood™ is:

- Impact resistant
- Dent resistant
- Moisture resistant
- Scratch resistant
- Resistant to discoloration
- Seamless.

And ECOWood's™ seamless edge means there are no gaps or cracks where bacteria can make an unhealthy home.

Whether you're looking for a square table edged in Kona, a rectangular table trimmed in Sierra, or a round table rimmed in Ritz Cordovan; ECOWood™ is the environmentally-conscious shape of things to come.

...without ever harming the beauty of these woods.

SurfaceWorks **ECOWOOD™**

Save money while you help save the environment. Although *ECOWood™* looks expensive, it actually costs less than most natural wood-edged tops. Add in the environmental impact and you have a real world benefit.

Our top substrate consists of recycled wood fibers, and our *ECOWood™* urethane edges are comprised of 65% natural vegetable oil by weight. This, together with our attractive laminates and other surface options make every *ECOWood™* table an affordable investment for your business and a smart investment in our future.

To experience *ECOWood™* for yourself, call us at 414-570-2677 or visit us on the web at www.surfaceworks.us.

GreenWorks™

All SurfaceWorks® tables are available in optional GreenWorks materials; featuring linoleum top surfaces, edges in ABS, wood, bamboo, or urethane, and NAUF (No Added Urea-Formaldehyde) substrate.
