

Urethane Edges

- **Extremely durable, impact and puncture resistant,** SurfaceWorks' urethane edges are perfect for heavy use applications such as office, education, healthcare and hospitality.

- Comprised of approximately **65% vegetable oil, PURTech®, PURWood® and ECOWood™** urethane edges are **rapidly renewable** and can contribute towards **LEED credits**.

- Offered in over **100 standard colors**, providing the variety required to suit your design needs.

- Available in **10 profiles**, including **ergonomic** profiles which provide comfort and reduce the risk of injury due to sharp edges, and our **No-Drip** profile, which contains spills to the table top; ideal for healthcare and food service applications.

- **Permanently bonded seams** do not allow liquids to seep into and collect at the seam between laminate and the edge; making our surface the only surface acceptable for many healthcare, education and food service organizations.

- **Anti-bacterial and anti-fungal** additives further reduce the risk of infection.

- SurfaceWork's **proprietary urethane formula** offers the perfect balance between durability and comfort.

- **UV resistant** material will not change color or break down over time.
