

U.S. GREEN BUILDING COUNCIL (USGBC) is a non-profit organization that certifies sustainable businesses, homes, hospitals, schools, and neighborhoods. USGBC is dedicated to expanding green building practices and education, and its LEED® (Leadership in Energy and Environmental Design) Green Building Rating System™.

The Leadership in Energy and Environmental Design (LEED) Green Building Rating System is a voluntary, consensus-based national rating system for developing high-performance, sustainable buildings. LEED addresses all building types and emphasizes state-of-the-art strategies in five areas: sustainable site development, water savings, energy efficiency, materials and resources selection, and indoor environmental quality.

SurfaceWorks has been a member of the USGBC since 2007; our products can help earn LEED points. For more information on The U.S. Green Building Council or the LEED rating system please visit www.usgbc.org.

The mark of responsible forestry

FOREST STEWARDSHIP COUNCIL® (FSC®) is an independent, non-governmental, not of the world's forests. It provides standard setting, trademark assurance and accreditation services for companies and organizations interested in responsible forestry. Products carrying the FSC label are independently certified to assure consumers that they come from forests that are managed to meet the social, economic and ecological needs of present and future generations. FSC has offices in more than 45 countries.

SurfaceWorks is FSC Mix certified; our FSC License Code is FSC-C014142. To download a copy of our chain of custody certificate, please [click here](#). This certificate covers the production of work surfaces using the percentage system. For more information on the Forest Stewardship Council please visit www.fsc.org

accomplishments in agricultural production, food processing and handling, forestry, fisheries, flowers and plants, energy, green building, consumer and business product manufacturing, and corporate social responsibility.

SCS GLOBAL SERVICES is global leader in independent certification of environmental, sustainability, food quality and food purity claims. Over two decades, SCS has developed internationally recognized standards and certification programs aimed at spurring the highest level of environmental improvements, social accountability and product performance. Its programs span a wide cross section of the economy, recognizing

SurfaceWorks has contracted SCS for third party verification in two certifications: **FSC® Chain of Custody certification and Indoor Advantage and Indoor Advantage Gold certification**. For more information on SCS Global Services or their certification programs please visit www.scsglobalservices.com.

SCS INDOOR ADVANTAGE AND INDOOR ADVANTAGE GOLD are Indoor air quality certification programs. The VOC criteria for the Indoor Advantage certification are based on emission criteria established in the Business and Institutional Furniture Manufacturer's Association (BIFMA) Standard for Low-Emitting Office Furniture Systems and Seating (ANSI/BIFMA X7.1) and the US Green Building Council's Leadership in Energy and Environmental Design criteria EQ4.5 (furniture and seating). Indoor Advantage Gold is a more rigorous test. The emphasis on individual VOCs rather than on total VOC concentration is one of the features that distinguish the SCS Indoor Advantage Gold program.

SurfaceWorks entire line of tables, table tops and worksurfaces are either Indoor Advantage™ or Indoor Advantage™ Gold certified. Our Indoor Advantage™ certificate number is SCS-IAQ-02071 and our Indoor Advantage™ Gold certificate number is SCS-IAQ-02194. To download a copy of our Indoor Advantage certificates, please [click here](#). For more information on Indoor Advantage or Indoor Advantage Gold please visit www.scsglobalservices.com.

**COMPOSITE
PANEL
ASSOCIATION**

COMPOSITE PANEL ASSOCIATION (CPA) represents the North American composite panel industry on technical, regulatory, quality assurance and product acceptance issues. CPA General Members include 40 of the leading manufacturers of particleboard, medium density fiberboard and hardboard. CPA's 200 members worldwide are committed to product advancement and industry competitiveness. As an accredited standards developer, CPA writes and publishes industry product standards. It also participates in the standards development work of ANSI, ASTM and others, sponsors product acceptance activities and works with government agencies and model building code bodies. CPA also conducts product testing and third-party certification programs, offering the first ANSI accredited Environmentally Preferable Product (EPP) certification program.

ECO-CERTIFIED COMPOSITE (ECC), as defined by Federal Executive Order 13101, are "products and services (that) have a lesser or reduced effect on human health and the environment when compared to other products and services that serve the same purpose." Furthermore, various states have adopted policies promoting sustainability to "reduce adverse impacts on natural habitats and species." CPA has adopted a voluntary Environmentally Preferable Product Specification (EPPS) to promote the fulfillment of these goals.

The Composite Panel Association (CPA) Eco-Certified Composite (ECC) Grademark Program has been developed to provide independent certification of wood composite products that are demonstrably environmentally preferable through their use of recycled and/or recovered wood fiber and adherence to voluntarily lower formaldehyde emission standards than government regulations. The Program includes requirements for

initial qualification for product certification, plant quality control procedures and periodic inspections by CPA - all designed to reasonably assure that certified composite panel products meet the Program's specifications.

All products produced by SurfaceWorks are ECC Downstream Certified. This means that SurfaceWorks has demonstrated their environmental commitment by purchasing at least 95% CPA ECC certified composite wood products for use in our products. For more information on the Composite Panel Association or the Environmentally Preferable Products Program please visit <http://www.pbmdf.com>.

THE UNITED STATES ENVIRONMENTAL PROTECTION AGENCY (EPA) TOXIC SUBSTANCE CONTROL ACT (TSCA) TITLE VI governs emission standards for composite wood products. This legislation was put in place in order to reduce the exposure of humans to formaldehyde gas. The requirements and emission levels set forth by the EPA are in line with the California Air Resource Board's Airborne Toxic Control Measure (CARB) Phase 2.

Products covered by this legislation include hardwood plywood, medium-density fiberboard, particleboard—as well as household and other finished goods containing these products such as furniture.

SurfaceWorks understands the importance of low formaldehyde emissions; for that reason all of the products produced by SurfaceWorks are compliant with EPA TSCA Title VI regulations. To download a copy of our TSCA compliance letter, please [click here](#).

For more information on the EPA Toxic Substance Control Act Title VI legislation please visit <https://www.epa.gov/formaldehyde/formaldehyde-emission-standards-composite-wood-products>

RESTRICTION OF HAZARDOUS SUBSTANCES (ROHS2) European Parliament Directive 2011/65/EU prohibits the maximum concentrations of the following Hazardous Substances: Mercury (Hg): 100 ppm Cadmium (Cd): 100 ppm Lead (Pb): 1000 ppm Polybrominated Biphenyls (PBB): 1000 ppm Polybrominated Diphenyl Ethers (PBDE): 1000 ppm Hexavalent Chromium (CrVI): 1000 ppm Bis (2-Ethylhexyl) phthalate (DEHP): 1000 ppm Benzyl butyl phthalate (BBP): 1000 ppm Dibutyl phthalate (DBP): 1000 ppm Diisobutyl phthalate (DIBP): 1000 ppm

All products sold by SurfaceWorks are in full compliance with RoHS. To download a copy of our RoHS compliance letter, please [click here](#). For more information on Restriction of Hazardous Substances please visit <http://www.rohs.eu>.
