

DAX™ TRAINING TABLES

DAX TRAINING TABLES

Spoil meeting goers and educators forever with Dax. These training tables are made to move effortlessly. One moment they're nested tightly in a corner; the next, gliding effortlessly into whatever configuration you can dream up. With Dax, table arrangements shift from "we'll make this work" to "what else can we do?" So, what will you do with Dax?

ARRANGE YOUR WAY

With Dax's unique top shapes, creative and flexible table configurations are vast. Make an oval, hexagon, squircle — heck, sit in a boomerang. For any meeting, classroom or collaborative environment, Dax puts the "range" in arrangement.

OR NEST THEM AWAY

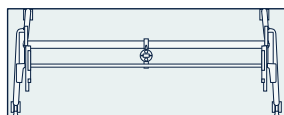

With the press of a lever, Dax's top flips up and away. Multiples tightly nest together with a mere 4" density. Plus, ultra-light aluminum legs and silky-smooth casters make storage—and rolling out of storage—a breeze.
