

CLARA TABLES

Clara is about bringing elements together - ideas, people, pets (well, a fish maybe). It's about transforming a ho-hum, straight-rowed, face forward kind of space into a dynamic, organic environment where people can do the best work they're together to do. Watch classrooms evolve into playgrounds, offices become innovation hubs, and lonely in-between spaces be infused with new energy.

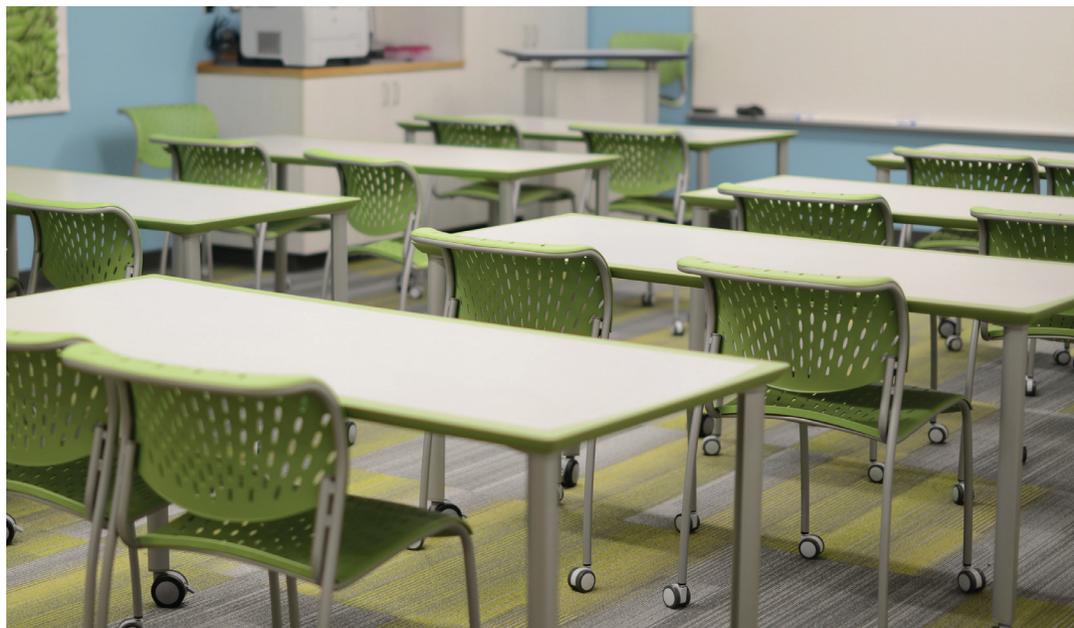

AT SCHOOL

Say bye bye to boring and hello to shapes that wiggle just as much as little learners do. Teaching and learning are dynamic and student-centric, and furniture's job is to adapt. Out with the old (school) and in with the new.

AT WORK

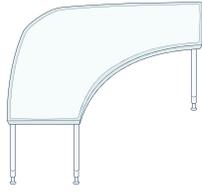

Just because you're a grown up doesn't mean the fun stops. You're at work more than you're home, so your office should be a place that's comfortable, personal, and inspires greatness (well, more greatness). With Clara, there's always room for creativity in your design, and collaboration in your workspace.

CLARA OVERVIEW
