## T-Base Conference Table

---

---

The Rapport T-Base Conference Table features a low profile foot combined with a high knee-clearance leg designed for user comfort. The optional Power/Data Trough incorporates durable sliding doors providing access to customizable power and data, while offering storage space for shared items such as remote controls, telephones, speakers or streaming devices. The easily removable inner leg panel provides convenient wire management, and leg panels and trough doors can be specified in matching or accent colors.

Rapport was designed by Jim Contois.
