STANDING HEIGHT

COUNTER HEIGHT

SEATED HEIGHT

The Rapport Island was designed to address the needs of busy, multi-use communal spaces. These seated, counter, or standing-height informal benches are ideal for spaces such as libraries, cafés, student unions and atriums. Reinforced with steel beams, the Rapport Island is available in 32" and 42" depths and uninterrupted spans from 60" to an astonishing 144". The Rapport Island features leg wire management and optional integrated front-mounted USB/power apron.

Rapport was designed by Jim Contois.
