F-SERIES PURWOOD URETHANE EDGE MODELS:

Wood grain textured urethane edge profile is on the user side only. Non-user sides consist of EB edgeband. Primarily for training tables and worksurfaces, this allows for flush connections between tops when connected or placed side-by-side, and the flexible mold process accommodates non-standard top lengths and some custom curved shapes. F-Series PurWood urethane edge models are generally restricted to colors that are also available in EB edgeband (denoted by **F**), however you may specify a non-matching edgeband color.
