

METAL TABLE BASES

- Clean metal bases with a solution of liquid dishwashing detergent and warm water. Lightly dampen
- a cloth in warm soapy water. Dry with a clean, non-abrasive cloth.
- Most household cleaners such as Formula 409®, Fantastik®, Windex® or diluted Simple Green®
- can be used as well.
- DO NOT USE any type of abrasive cleaners, as this will cause scratching.
- DO NOT soak the base in water, as this will cause rusting.
