

RAPPORT TROUGH

Rapport Conference T-Leg and Rapport Media Tables are available with a Power / Data Trough. The amount of power and data is scaled with the size of the table (detail on back). Units include standard 15amp power plugs, USB 2.0Amp charging duplexes and open data ports. Open data ports can be filled with optional accessories including USB data, Ethernet ports, Phone jack or several others listed in the SurfaceWorks Pricelist.

LAYOUT:

Trough width is dependent on the width of the table. Tables with a width less than 54" use a 6" trough and tables with a width of 54" or wider use a 12" trough. 6" troughs feature a single Axil-Z unit under each sliding door (below in light grey w/ arrows indicating opening direction). 12" troughs have 2 Axil-Z units under each door.

Table Width	Trough Width
<54"	6"
54" +	12"

CONFERENCE T-LEG TABLES

Single Section (120" and less)

Multi-Section (144" and longer)

MEDIA TABLES

12" Trough

6" Trough

Top Length						
60"	2	0	0	4	1	2
72"	2	1	0	4	2	3
84-96"	3	1	1	6	3	4

VIDEO SWITCH KIT:

The Video Switch Kit comes with 4 HDMI cables with built in switch. 3 cables are housed in the Axil-Z unit inside the trough. A 4th cable is used to display a PC housed in the cabinet or mounted under the surface. To display a laptop or tablet simply press the button on the cable and that device will be displayed on the screen. Simply press another button to switch between devices. The cabinet PC is controlled with a button in the Axil-Z unit.

A blue LED lights up to show the active cable

The switching hardware conveniently mounts under the trough to keep all cables concealed from sight.
